BENJAMIN NWANDU

AI Automation Specialist | Agentic AI · n8n · LLM Workflows · Voice AI

Lagos, Nigeria (Remote, US hours) · nwanduben@gmail.com · nwanduben.dev · linkedin.com/in/benjamin-nwandu

PROFESSIONAL SUMMARY

- Builds agentic AI workflows with Claude and OpenAI that automate business processes end to end, integrated with CRMs, calendars and messaging.
- QA'd production voice AI agents for 6 client accounts at a US voice AI agency, including 3,000+ calls/week for a single client, on Vapi and Telnyx.
- Designs for reliability: test suites, human-in-the-loop handoffs, deterministic scoring and cost-controlled LLM calls before anything ships.
- Writes Python and FastAPI when no-code hits its limits: custom tools, APIs and integrations.
- Data science background: deployed 7 ML models with FastAPI. Documents every build so clients and teams can run it.

CORE SKILLS

- **Automation:** n8n · REST APIs · Webhooks · JSON · Error handling
- **AI:** Claude · OpenAI (GPT-4) · ElevenLabs · Vapi · Retell · Telnyx · Prompt engineering · Tool calling · Chatbots & virtual assistants
- **Code:** Python · FastAPI · JavaScript · Git · Pandas
- **Systems:** HubSpot · GoHighLevel · Google Sheets & Calendar · WhatsApp API · Telegram
- **Quality:** Evals · Regression tests · Call QA · Root-cause analysis · Human-in-the-loop

SELECTED IMPACT

- **Cut daily call review from 6-7 hours to under 2** by building a Python + Claude call-classification tool (511 tests); it revealed **90% of a client's calls went unanswered**, leading to a redial strategy that **doubled conversations**.
- **Diagnosed caller-identification failures and 8-10 second calendar-lookup delays** in production voice agents; fixes shipped **within ~3 days** of each flag.
- **Shipped a live n8n lead pipeline** (Claude, HubSpot, Telegram) that surfaced qualified sellers on its first run, with keyword pre-filtering to keep LLM costs low.

EXPERIENCE

QA Analyst, Conversational AI | VoiceROI (US voice AI agency) | Remote | Mar 2026 - Aug 2026

- Monitored production voice AI agents for **6 client accounts** in healthcare, finance, wellness and entertainment, reviewing **3,000+ calls/week** for the largest client on Vapi and Telnyx.
- Built a Python + Claude call-classification and reporting tool on GoHighLevel call data that routes uncertain cases to human review, cutting daily review from **6-7 hours to under 2**.
- Found that **90%** of one client's calls were never answered, reframing a weak-agent problem as a reach problem; the redial strategy that followed **doubled conversations**.
- Traced agent failures to their root cause (prompt, flow, tool config or workflow logic), including caller-ID errors and **8-10s** calendar-lookup latency; fixes shipped within **~3 days**.
- Created and documented a standardized 9-component prompt framework (role, task, chain of thought, context, example conversations, dynamic variables) used to fix and build agent prompts.
- Ran before-and-after QA across the **Vapi to Telnyx migration** to confirm agent behavior held on the new platform.

Data Science Consultant (Work-Experience Program) | AMDARI | Remote | 2023 - 2025

- Built and deployed **7 machine-learning models** on banking, retail and healthcare datasets, including a sentiment classifier at **87% accuracy**, served as REST APIs with **FastAPI**.
- Cleaned and analyzed data in Python and Pandas, and explained model results to non-technical reviewers.

Medical Sales Representative | Vinco Pharmaceuticals | Nigeria | May 2021 - Nov 2025

- Prospected a territory and presented to doctors, pharmacies and hospital decision-makers, handling objections and securing follow-up meetings.

PROJECTS

- **ENTIN Bank AI Voice Support** (n8n, ElevenLabs): Customer-service virtual assistant for a bank, built on 5 n8n workflows behind a 13-tool agent, enforcing identity and risk rules in the workflow, not the prompt; 33 end-to-end tests on a 500-customer synthetic dataset.
- **Real Estate Lead Scout** (n8n, Claude, HubSpot) **Live:** Lead pipeline that extracts intent with Claude, scores in tested code, dedupes, syncs to HubSpot and alerts a human with a drafted reply.
- **Fairy Share Dental Receptionist** (FastAPI, Open Dental, n8n): Booking agent that confirms only after read-back verification; live booking verified end to end.
- **Agent Preflight** (Python, FastAPI): Pre-release checker for broken contracts between agent tools and n8n workflows; caught all 7 planted faults (34 tests).

EDUCATION

B.Tech, Biomedical Technology | Federal University of Technology, Owerri (FUTO) | 2018
